Gentlemen:

The Department of Energy, Rocky Flats Field Office is transmitting the report entitled "Rocky Flats Plant Soil Treatment Bench-Scale Treatability Studies" for your information. This report summarizes the test work conducted by Nuclear Remediation Technologies on soil taken from Operable Unit No. 2. The test work was carried out during the spring of 1993. The conclusion of the test work was that the techniques utilized in the test work did not effectively concentrate the plutonium contained in the soil.

If you have any questions please contact Norma Castañeda at extension 4226.

Sincerely,

*Steven W. Slaten*  
Steven W. Slaten  
IAG Project Coordinator  
Environmental Restoration
